

Multi Sector Assessment MSA KANDAHAR

Nutrition Food Security WASH and Mortality in Kandahar
Province of Afghanistan during January-February 2017

Report done: March 2017

APPENDICES

List of Appendices

- 1) Questionnaires in Pashtun and English
- 2) Field instruction for enumerators in Pashtun and English
- 3) FCS HDDS HHS tables
- 4) Standardization test of enumerators training
- 5) Result Tables for NCHS growth reference 1977
- 6) SMART Plausibility Report
- 7) BARAN NGO last 3 years SAM-OPD activity
- 8) OCHA WWW Operational Presence Dec 2016
- 9) Presence of Health Services “white areas” Handmade Map
- 10) Training schedule
- 11) Results of Phase 1
- 12) List of Villages and PDs with population size for cluster selection

Enumerators' briefing

Appendix 1: Questionnaires in Pashtun and English

په کندهار کې د خوځونې کلسټر یوه جامع او چټکه ارزونه (MCRA)

ټیم _____ نېټه _____ / _____ / _____ پوښتلیک لټه _____
 ولسوالۍ _____ کلي _____ ناحیه _____ GPS _____ / _____ / _____
 آیا زه ستاسو څخه پوښتنې کولای شم؟ هو نه جنس: نارینه ښځینه عمر _____
 د فاهیل په اړه معلومات: خایې اوسیدونکی داخلي بی خایه شوی اسناد لرونکی راستون شوی بېله اسناد لرونکی راستون شوی
 د کورنۍ د اوسیدو د ځای پوښتنې: خیمه دڅپو جوړ د څینو جوړ اپارتمان
 آیا روغتیایی خدمتونه لاسرسی لری؟ هو = 1 لیری دی = 2 پیسی د کهنټ له سببه = 3
 د فاهیل د مشر نوم _____ جنس: نارینه ښځینه عمر _____
 د فاهیل دغرومچو عی شمیر _____

عمر	6-0 میاشتو	6 میاشتو-5 کالو	18-5 کالو	50-18 کالو	50 کالو پورته
نارینه (عمر)					
ښځینه (عمر)					
مینتو اړه یا شیدی ورکونکی ښځه					
خوار خوراکه؟					
معلول؟					

(FCS/HDDC) د کورنۍ د خوړو د تنوع نمره/د خوړو د مصرف نمره:
 زه غواړم ستاسو څخه د مختلفو غذايي توکو په اړه پوښتنې وکړم، کوم چې ستاسو فاهیل پرون او په تیرو 7 ورځو کې خوړلی دی. آیا تاسو راته ویانې شې چې ستاسو د کورنۍ غړي په تیرو هفتو کې لاندې غذايي مواد یې خوړلي دي؟ (د هرې غذا په هکله د هغه د لمرنۍ سرچینه او همدارنگه دوه سرچینه په هکله پوښتنې وکړی، که چیرې وی.)

غذايي مواد	په هغه ورځو کې چې غذا خوړل شوی		دوه سرچینه
	پرون	په تیرو 7 ورځو کې	
1: جواړی			
2: وریجی			
3: پوډی/غنم			
4: کچالو			
5: دال، حیوانات او وچه میوه			
6: ماهی			
7: Fish powder			
8: سره غوښه (پسه، اوزه، غوایی)			
9: پښی غوښی (چرگ)			
10: سبزيجاتې غوړی			
11: هڅی			
12: شیدی او لښات (اصلي غذا)			
13: په چاپو کې لواندازه شیدی			
14: سبزيجاتې (سره د پاي)			
15: میوه جلت			
16: شیرینی، پوره			

د غذايي موادو د سرچینې کوډ: 1= رانیول 2= خلی تولید 3= تجارتي توکي/ختماتی، تبادلې سوی=3
 پور کړل سوی=4 تحفه سوی=5 هرسته شوی غذايي توکي=6 نور (مشخص یې کړی)=7
 (HHS) د کورنۍ د لوړې مرجه: په تیرو څلور هفتو کې (30 ورځو کې) آیا تاسو او یا ستاسو فاهیل:
 0=هیڅ 1=په ندرت (1-2 ځلی) 2=بعضی اوقات (3-10 ځلی) اکثره اوقات (اضافه تر 10 ځلی)
 1: پرېشانه سوی بلست چې ستاسو فاهیل به کافی اندازه خواره و نه لری
 2: د سرچینې له کهنټ له امله نه سی کولای چې هغه خواره و خوړی کوم چې تاسی ترجیح ورکوی.
 3: د سرچینو د کهنټ له امله باید محدود ډول غذا وخورئ.
 4: د نورو غذايي موادو د سرچینو د کهنټ له امله هغه غذايي مواد وخورئ کوم چې تاسی په واقعیت کې نه غواړی

- 5: لږه اندازه خواړه وخورئ تر هغه چې تاسو ضرورت ورته لرئ ځکه چې کافي خواړه نسته
- 6: په ورځ کې باید لږ ځلي خواړه وخورئ ځکه چې کافي اندازه خواړه نسته
- 7: آیا کله هم داسې ورځ راغلي چې تاسې په خپل کور کې هېڅ ډول خواړه نه وي خوړلي، ځکه چې سرچینې نسته چې غذایی مواد ورباندې تر لاسه سي
- 8: د کافي غذایی موادو د نه شتون له امله کله هم وری بیده سوی یاست.
- 9: د کافي غذایی موادو د نه شتون له امله آیا کله هم داسې راغلي چې په ټوله ورځ او شپه کې مو هېڅ هم نه وي خوړلي

تی ورکول (Breast Feeding): په اولو 6 میاشتو کې آیا تاسو خپل ماشوم پر علاوه د تی څخه په نورو شیانو هم هروئ؟ هو نه

د ماشوم د زیږون وروسته په فوري توګه ماشوم تاسو څنگه مړه وي؟ په 1 ساعت کې دننه تی ورکول نور واکسین: آیا ستاسو ټول ماشومان مکمل واکسین شوي دي؟ هو اطمینانې نه يم ټول نه دي سوی هېڅکله یوه هم نه دي سوی.

پولیو (ګوزن) ټیټانوس شری BCG (توبرکلوز) HB (تورډری) پینتا واکسین کړت لري هو نه وکتل شي: صحیح ده نه

(WASH) پاکي اوبه، پاکوالي او حفظ الصحه: آیا تاسو د اوبو سرچینه لږی 500 متره څخه په ګمه فصله ؟ هو نه هو مونږ په کور کې داوبو نلکه لرو.

د کليوالي اوبو د سرچینو ډول؟ اوبله سیند چینه لاسی بیه واټر پمپ سره د نخیری تاسی څه ډول تشاب لري؟ د باندې آزاد محیط کليوالي ډول عصري تل لرونکی تاسو څنگه خپل لاسونه پرېولي؟ نه یې پرېولم ریګ سره ایره سره اوبیسره په اوبو او صابون سره څه وخت تاسو خپل لاسونه پرېولي؟ سهار/ماتم مخکې له ږوې د خواړه د جوړولو مخکې تر نغوټ وروسته (تیناب)

تاسو څنگه د چنولو اوبه پاک کوي؟ هېڅ فیلتر کوو کلورین پواسطه جوشوو بوتل رانیسو

SMART: د هر ماشوم لپاره په هر کور کې چې تر 6 میاشتو څخه پورته او 59 میاشتو څخه کم (=5 کاله) عمر

د زیرینو نښه	عمر په میاشت	جنس	وزن	قد	پرسوب (EDEMA)	فرقتی بازو د منځنۍ برخې محیط (MUAC)

د مریضې د یادینو موده: د لوی اختر څخه (2016 سپټمبر 11)

جنس	عمر	یو ځای کیدل	پرینټونل	زیرینل	مړینه	سبب	ځای

سبب: 1 نه دی معلوم 2: زخمی کیدل/ضربه: 3: ناروغی
 ځای: 1 اوسنی 2: هجرت په جریان کې 3: پخوانی ځای 4: نور
 د INTER SOS او HRDA د موسسې له خوا مونږ ستاسو له همکارۍ څخه بیره مننه کوو.

~~~~~  
**HDDS/FCS:** I would like to ask you about different foods that your household members have eaten yesterday and in the last 7 days. Could you please tell me how many days in the past week your household has eaten the following foods? (for each food ask the primary source of each food as well as the second main source, if any)

| Food Item                                  | Days eaten |             | Primary Source | Secondary Source |
|--------------------------------------------|------------|-------------|----------------|------------------|
|                                            | Yesterday  | Past 7 days |                |                  |
| #.1 – Maize                                |            |             |                |                  |
| #.2 – Rice                                 |            |             |                |                  |
| #.3 – Bread/wheat                          |            |             |                |                  |
| #.4 – Tubers                               |            |             |                |                  |
| #.5 – Groundnuts & Pulses                  |            |             |                |                  |
| #.6 – Fish (eaten as a main food)          |            |             |                |                  |
| #.7 – Fish powder (used for flavor only)   |            |             |                |                  |
| #.8 – Red meat (sheep/goat/beef)           |            |             |                |                  |
| #.9 – White meat (poultry)                 |            |             |                |                  |
| #.10 – Vegetable oil, fats                 |            |             |                |                  |
| #.11 – Eggs                                |            |             |                |                  |
| #.12 – Milk and dairy products (main food) |            |             |                |                  |
| #.13 – Milk in tea in small amounts        |            |             |                |                  |
| #.14 – Vegetables (including leaves)       |            |             |                |                  |
| #.15 – Fruits                              |            |             |                |                  |
| #.16 – Sweets, sugar                       |            |             |                |                  |

Food source codes: Purchase = 1 Own production = 2 Traded goods/services, barter = 3  
Borrowed = 4 Received as gift = 5 Food aid = 6 Other (specify) = 7

**HHS:** In the past 4 weeks (30 days) did you or any household member:  
Codes: 0 = No 1 = Rarely (1-2 times) 2 = Sometimes (3-10 times) 3 = Often (more than 10 times)

- worry that your household would not have enough food? [ ]
- not able to eat the kinds of foods you preferred because of a lack of resources? [ ]
- have to eat a limited variety of foods due to a lack of resources? [ ]
- have to eat some foods that you really did not want because lack resources for other foods? [ ]
- have to eat a smaller meal than you felt you needed because there was not enough food? [ ]
- have to eat fewer meals in a day because there was not enough food? [ ]
- was there ever no food to eat of any kind in your house because of lack of resources to get food? [ ]
- go to sleep at night hungry because there was not enough food? [ ]
- go a whole day and night without eating anything because there was not enough food? [ ]

**BF** In his/her first 6 months do U feed the baby also with other things beside BF? [Y] [N]

How do U feed baby immediately after birth? BF within 1 hour [ ] Other [ ]

**Vax** Did all your children received full vaccinations? [Y] [Not sure] [Not all of them] [No Nobody Never]

Polio [ ] Tetanus [ ] Measles [ ] BCG [ ] HB [ ] Penta [ ] Have booklet(s) ? [Y] [N] Check [OK] [No]

~~~~~

WASH Do you have a water source <300m? [Y] [N] [] Yes we have tap water at home

Kind of rural WS? Stream [] River [] Spring [] Well with hand pump [] Well with motor-pump + reservoir []

What kind of latrines do U have? Open air [] Rural type [] Sewage System []

How do U wash hands? Cannot wash [] Sand [] Ashes [] Water [] Water and Soap []

When do U wash hands? Morning/Evening [] Before eating [] Before prepare food [] After defecate []

How do U obtain clean Drinking Water? Nothing [] Filtering [] Chlorination [] Boiling [] Buying bottles []

د سروی او د پوښتلیک د ټکولې لپاره لارښوونه

1 پړاو: د بیل څخه شروع کول

د ورځنۍ دندې لنډ معلومات (هغه مشکلاتونه چې پرون ورسره مخ سوی یاست، پر مشکلاتو کتنه کول او د حل لاری) د ترازو اصلاح کول په معیاری وزن سره

د کنټرول چیک لسټ (د هر ټیم لپاره): ترازو، متر، MUAC (5)، پوښتلیک (30)+ نختی میز د لیکلو د پارچه، د یادابنت کتابچه، قلمونه، GPS، د تصادفي نمبر جدول (1)، WHZ او MUAC د فیرست جدول، د روغتیا و مرکز ته د ماشومانو د لیږد فورمه، اسباب د ماشومانو لپاره، گرځنده ټیلیفون، دغرمی د ډوډی بګس، اوبه + موټروان، که چیرې ټول موجود دی= نو سحی ته حرکت وکړئ!

د موټر په ذریعه و کلسټر ته رسیدل

د نلجی او یا د کلی د جی پی ایس اتصال او لیکل

رسیدلې وکی و خلی مشرانو ته، ځلونه ورته معرفي کړی، د روغتیا د ریاست مکتوب ورښکاره کړی او د همکارۍ غوښتنه ځنې وکړئ

2 پړاو: په کلسټر کې د کور انتخابول په تصادفي شکل سره:

د کلی او یا د نلجی مرکز ته ورشی، پر مځکه باندې قلم وڅرخوی او او د قلم د څوکی په تعقیب حرکت وکړی تر څو چې د کلی و پای ته ورسیدی، حساب کړی هغه کورونه کم چې ناس پیداکوی پر هغه سوک چې ته ځی، د کلی په اخیر کی ودریږه او قلم بیا وڅرخوه تر هغه چې تاته یوه لاره په لاس درکی. اوس هغه تصادفي جدول وگور

ی کومه شماره تاسو ته ددی کلی لپاره درکول شوی دی. که د مثال په توگه ۷ شماره وی نو پدی نوی لاره کی بیا کورونه وشعیرئ تر څو چې ۷ کور ته ورسیدی، ددغی اووم کور د راسته طرف څخه سروی شروع کړی او په راسته طرف ادامه ورکړی تر څو چې خپل ټاکلی هدف ته ورسیدی.

3 پړاو: په فامیل کې

ده خلی مشرانو په همکارۍ کورنیو ته لاسرسی کول.

اجازه ځنې واخلی او تشریح ورکړی.

اول خبری وکړی وروسته یی ارزایی کړی

د ماشوم میندی هم په کی ښکیل کړی

پوښتلیک: هو گرو یی، اخیرې صفحه ته وگورئ

آخرنی پوښتنه به د مرګ وهیر په هکله وی.

په ټول پوښتلیک کې: صحیح جواب په لا سره وښایست نه په ټکی سره، په یاد واری چې ټکی (.) صحیح نه معلوماتی

که چیرې د وضاحت غوښتنه سوی یی، (1 یا 2 یا 3، 4) نو هغه انتخاب سوی شعیره په قوس کې ولیکی - مثال [2]

په اوئی برخه کی زموږ هدف دا دی چې صحیح سروی وکړ او په ښه کیفیت سره اندازه واخلو.

دوهم هدف مو دا دی چې یو کلسټر په یو ورځ کی تکمیل کړو که نه نو موږ به بیا و همدغی ځای ته راځو چې دا به بیر وخت ونیسی.

زموږ هدف په یو ورځ کی او په یو کلسټر کی ۱۸ ماشومان دی.

ځانګړی قضیې او پیشنهادات

هيڅ نه بدلول، هيڅ نه انتخابول

هيڅ کله هم او په هيڅ دليل سره يوه کورنۍ په بله کورنۍ مه بدلوي او هيڅ کله هم خپل د خوښې انتخاب مه گوډ کوم چې ستا له نظره يو کور تر هغه بل ښه وي، هغه کور غريب، معلومبيري او داسې نور..... که چيري يو دليل دا وي چې يو کور تاسې لاس رسې نشي کولای (په خاطر د نه همکاري او داسې نور مسائل) پس ياد داشت واخلئ او بل کور ته لاړ شئ.

زيات فاميلونه به يو کور کې:

پدې صورت کې د کورنۍ تعريف تعقيب کړئ، يوه بله د خاطر چې اوسيري (بيبيري) تر يوه چت لاندې او د يوې اشپزخانه د لوبو څخه خپرول کوي.

که چيري په يوه حالت کې ډير زيات فاميلونه په کور کې وي تاسو بايد يوه کورنۍ په تصادفي ډول انتخاب کړئ. د مثال په ډول، که چيري په يو کور کې ۵ فاميلونه اوسيري، نو تاسې هر فاميل نه يوه شميره ورکړئ او پر کوچني کاغذ بلندي وليکئ او په خپل لاس کې يې ونيسئ، ده يو نفر څخه غوښتنه وکړئ چې د ټولو کاغذانو څخه يو کاغذ پورته کړي او بيا هغه فاميل سروې کړي او هغه فاميل انتخاب کړي.

ټول ماشومان په صحيح توگه اندازه کړئ:

هميشه ټول ماشومان په صحيح توگه اندازه کړئ حتی که نوډ ماشومان غبرگولي وي.

تر ټاکلي هدف ډير زيات ماشومان:

هميشه په يو کور کې ټول ماشومان په صحيح توگه اندازه کړئ، که څه هم تاسې به يو کلسټر کې و خپل ټاکلي هدف ته رسيدلې ياست. نتيجه به يې دغه وي چې په اخري کور کې تاسې په ډير ماشومان اندازه کړئ وي. هيڅ مشکل نسته فقط ادامه ورکړئ.

د کافي ماشومانو نه شتون:

کچيري تاسې په يو کلي او يا ناحيه کې د کورنيو سروې سمه کړئ، مگر بيا هم د ماشومانو ټاکلي تعداد ته نه ياست رسيدلې، دا به هتني وي چې تاسې بل کلي او يا ناحيه ته د سروې لپاره ورشئ، تر څو خپله سروې تکميل کړئ. خنې وخت داسې په ندرت پيښي چې تاسې د کلي د ټولو کورونو څخه لينته کړئ وي مگر بيا هم کافي ماشومانو تعداد مو د سروې لپاره نه وي موندلې. نو بيا تاسې کولای شئ چې خپل سوپروايزر ته تليفون وکړئ او يو نودي کلي ته لاړ شئ. په نودي کلي کې تاسې بيا هم کورنۍ د هغه تصادفي مېتود په طريقه انتخاب کړئ.

هيڅ ماشوم په يو کور کې:

هيڅ خبره نه ده، پوښتليک د هغه کورنۍ په هکله ټک کړئ، مگر د دې کور لپاره به ماشوم نه وي چې اندازه يې د سروې په پاڼه کې وليکو.

خالي کور:

کچيري په يو کور کې هيڅ څوک نه وي او کور خالي وي نو يادانيت يې کړئ او بل کور ته ور سئ. کچيري کور خالي وي اوڅنگ هم شايد راسې (د همسايه څخه پوښتنه وکړئ) يادانيت يې کړئ او بل کور ته ولاړ سئ سروې وکړئ او بيا بيرته ورته راسې کچيري څنگ راغلې وي نو سروې يې وکړئ. کچيري کور خالي وي پدې خاطر چې د هغه کور ټول اشخاص مړه سوي يې، نو تاسې د همسايه څخه د هغه کور په هکله د پوښتليک پواسطه پوښتنه وکړئ او په اخير کې ددې کورنۍ ټول اشخاص د د مرگ و مير د کچې په برخه کې ثبت کړئ.

غير حاضر ماشومان:

کچيري په فاميل کې ماشومان موجود نه وي (هغه ماشومان چې اندازه يې بايد واخلئ شئ) يادانيت يې کړئ، مگر دهغه کور په هکله د سروې پوښتيا په ټک کړئ او بيا پوښتنه وکړئ چې ماشوم کله کور ته راځي. اوس خپل سروې ته ادامه ورکړئ مگر په آخره کې دا مه هيرئ چې بيرته دغه کور ته راشئ که ماشوم راغلې وي چې اندازه يې واخلئ. هيڅکله يو ماشوم په بل ماشوم مه عوض کړئ، کچيري د کورنۍ ماشوم د خوړو په مرکز او يا نودي کلينک کې وي نو دا ډيره مهمه ده چې تاسې هغه د خوړو مرکز او يا هغه نودي کلينک ته ورشئ او ماشوم اندازه کړئ، په خاطر ددې چې کيدای شئ چې دغه ماشوم خوارخواکه وي دا کار به حتما وخت نيسي مگر دا به ډير ښه وي چې تر سره يې کړئ.

مطلوب ماشومان:

کچیری د یوه کورنی معلول ماشومان عمر د ۶ الی ۳۶ میاشتو پوری وی نو دوی هم باید د نورو ماشومانو په څیر په سروی کی داخل او اندازه شی، کچیری په کوم دلیل سره د ماشوم د بدن اعضا صحیح شکل ونلری او یا هم نور مشکلات ولری او دا د دی سبب کیږی چی تلسی ټولی اندازی واخلئ پس فقط یی یادابنت یی کړی، هغه څه چی امکان لری اندازه یی کړی، (په عمومی توگه زیات وخت مشکلات وی د دوی د قد په اندازه کولو کی وی مگر عمر، وزن، پروسوب، MAUC اندازه و ثبت کیدای شی.)

4 پر او: راستنیدل او جواب

خیل پوښتلیک در سره یوسی و HRDA ته

ترازوییا اصلاح کړی.

لنډ معلومات ورکول: مشکلات چی ورسره هغ سوی پاست، د حل لاری، د سیا د پاره پلان

5 پر او: د معلوماتو ثبت کول او څیړنه کول

پوښتلیک:

(1) د فاهیل بیرنډلوی او تشریح

کورنی = د خطایو یو گروه چی د یو چت لاندی ژوند کوی او د یوی آتیز خالی څخه استفاده کوی. د پوښتلیک نمبر: که چیری ستاسو ټیم پرون سروی یی پر ۲۳ نمبر توقف کړی وی پس نن باید تلسو ۲۴ څخه شروع کړی، یعنی په مسئله توگه سره. صحنی خنډاتو ته لاسرسی درلودل: که چیری دوی په 1 ساعت کی و روغتیایی مرکز ته رسیری د هو جواب لپاره (۱) او کچیری جوان نه وی، د لیری والی په خاطر او د موټر د نه درلودلو په خاطر او یا داسی نورو مسایلو له سببه نوییا په قوس کی (۲) لیگل کیږی. او که د بیسی د کښت او نه موجودیت له سببه وی نو په قوس کی (۳) لیگل کیږی. څنگ په هر فاهیل کی: عمر یی باید په صحیح توگه په قوس کی ولیکل شی. مثال، (33). PLW: تی ورکونکی او حامله ښځه معلول: یعنی د بدن عضوه یی قطع شوی وی، نابینا، عصیی ناروغ، د اوریدلو او خبری کولو مشکلات... که چیری تلسو یو شخص ولیدی چی معلول وی، لطفا په (۷۷) سره یی نښتی کړی او په هغه صحیح توگه یی په قوس کی ولیکی.

(2) HHS /FCS/ HDDS دکورنی د خوړی د تنوع نمره/د خوړی د مصرف نمره/ د کورنی د لوړی مرجه تلسی یی خپله هغه د پوښتلیک سوالونه یو په یو تشریح کړی او د دوی جواب په نښه کړی.

(3) VX/BF تی ورکول/ واکسین ورکول.

تلسی نظر مه ورکوی بلکه د پوښتلیکی مطابق د دوی څخه نظر واخلئ او بیا د دوی نظر په پوښتلیک په نښه کړی.

(4) WASH پالی اوبه، پاکوالی او حفظ الصحة

تلسی نظر مه ورکوی بلکه د پوښتلیکی مطابق د دوی څخه نظر واخلئ او بیا د دوی نظر په پوښتلیک په نښه کړی.

(5) SMART

په یوه کورنی همیشه هغه ماشومان اندازه کړی چی عمر ونه یی د ۶ میاشتو او ۵۹ میاشتو پوری وی. کچیری یو مور د ماشوم عمر تلسو ته صحیح نه شی ویلئ، پس د واکسین کارت یی چیک کړی، او یا مطی جنتری څخه استفاده وکړی. کچیری بیا هم د ماشوم سن نه شو معلوم، پس د ټولو ماشومانو قد اندازه کوی او بیا دهغو ماشومانو مکمل اندازه اخلو کوم چی قوتونه یی ۶۵ او ۱۱۰ سلنتی متر په منځ کی وی. کچیری په یو کور کی د داسی عمر ماشومان نه وی چی اندازه شی پس د پوښتلیک نوری برخی د مرگ ومیر تر کچی پوری پک کړی او د کورنی څخه مننه وکړی او د بل کور د سروی لپاره حرکت وکړی. د اندازه کولو لپاره پروسیجر:

کالی: فقط نازک کالی او تئیان، خولی یی باید لیر شی.

پرسوب: 0، +، ++، +++

MUAC

خوار خواکه ماشوم باید و یو نردی روغتیایی مرکز ه ولیردول شی

د هرگ و میر کچه:

د پورنتیایی مطابق تلسی یی ورته تشریح کری

مطبی جنتری - تیر لوی اختر د تاریخ څخه استفاده وکری، تیر لوی اختر د ۲۰۱۶ کال د سپتمبر په میاشت کی وو.

نیټه باید په داسی شکل ولیکل شی چی: 161225 یعنی د ۲۰۱۶ کال د دسمبر د میاشتی ۲۵ نیټه د هرینی د معلوماتو په صورت، تلسی باید د هرینی دقیق ارقام او سبب یی په پورنتیایه کی ولیکی

INSTRUCTIONS

Step 1: start up from base

Day mission briefing (problems faced yesterday, previews of problem, solutions)
 Calibrate Scale w standard weight
 Control Checklist (for each team): scale, meter, MUAC(5), questionnaires (50) + wood-table for writing,
 booknotes, pens, GPS, random number tables (1), WHZ and MUAC reference tables(3), forms for children
 referral to centers, gadgets for children + mobile phones, lunchboxes, water + car driver if all ok = go!
 Reach the cluster (vehicle)
 Take the Village/PD GPS position and write it down
 Approach the local stakeholder, introduce yourself, show letter PhD, ask assistance

Step 2: HH random selection in the cluster

Go to the center of the village/PD, spin a pen on the ground and follow the given direction to the edge of the village/PD, counting the number of houses you find on your walking road. Stop at the end of the village and spin again the pen until it shows one direction to the village. Now check your random number table. If for example you have counted e.g. 12 houses on your walk and the first random number (less than 12) you see on the table is 7 then go to the seventh house counting back. This is your first Household. After that go to the HH to the right, and then again and again to the HH to the right until you have completed the given Household. This is called the “modified EPI method.”

Step 3: in the household, HHs phase

Approach the HH with help of local stakeholder
 Ask permission and explain
 First speak than measure
 Involve mothers
 Questionnaire: how to do, see the last pages
 Mortality will be the last questions
 In all questionnaire: mark with an X the correct answer, please not use the . it is NOT clearly visible!
 If there are specifications (e.g. select 1 or 2 or 3, 4) put in the brackets [] the correct number – e.g [2]
 Our MAIN target is to make correct assessment and good quality measure
 The secondary target is to complete 1 cluster in one day, otherwise we will have to come back in the same place and this will require more time.
 We will establish number of children per cluster (ideally around 20-25) after field test/validation of questionnaire.

Special cases and recommendations:

- No substitution, no selection: never substitute one household with another for any reason and never do some voluntary selection according to your ideas like that house is more ready accessible, that house look better, that other looks poorer ... etc. If for any reason one house cannot be approached (bad dogs, unfriendly people etc.) Simply take a note and go to the next house according to the rules.
- More families in the same house: follow the definition of household = group of people living (sleeping) under the same roof and eating from the same kitchen pot. In case of more HH/families in the same house you have to RANDOMLY select one. Example there are 5 families in the same house. Assign one number to each family 1,2,3,4,5 and write this number on five little pieces of paper. Than close the papers in your hand and ask somebody to pick up one number by chance: this will be your assessed HH/family.
- Measure ALL children in the correct range: always measure all the children of the correct range in a family, even if they are twins!

The questionnaire:

1) HH identification & description

HH = group of people living under the same roof and eating from the same cooking pot

Questionnaire #: the progressive HHs number of your team, i.e. if yesterday you stopped at 23, today you start with 24

Health Service Accessible? In case of need do they feel to be able to swiftly (1h) reach one Health Service for assistance? [1] = yes; [2] no, it is too much distant away for us (we have no car, etc.); [3] no, we do not have money

People in the HH: put the age(s) separated by a dash in the correct place of the table - e.g. 33-42

PLW? Pregnant or Lactating Woman

Malnourish? If they just perceive that the person is malnourished

Disabled? Amputations, blind, mentally impaired, listen/speech problem ... if they perceive that the person is disabled, identify with -yy - in the correct place of the table

2) HDDS/FCS HHS

Self explaining

3) BF Vax

Self explaining

Do NOT suggest the answer! Just ask and take mark of what they say

4) WASH

Self explaining

Do NOT suggest the answer! Just ask and take mark of what they say

5) SMART

We always check all the HH children in the range age 6-59 months (or 65-110 cm if age in months unavailable)

Establish Age: if the mother does not know the age in months, check vaccination booklet, compare to the known age of another child, utilize some well known event in the community for comparison (local calendar)

If it is not possible to know age in months we rapidly screen height and then we measure well all children in the range height 65 to 110 cm

Limit to check height standing or laying down = 87cm (have a control stick)

If there are no children in the correct range: go on, complete the questionnaire, including mortality, say thanks and leave for next HH

Procedures for special cases:

Too many children: once in the HH we always measure ALL the children of the correct age in the HH, even if this means we will end up measuring more children than planned. This is expected.

Too few children: if we complete the cluster and we have NOT reached the expected number of children then we will have to move to the nearest village and to repeat the whole procedure, including HH random sampling. Ask the stakeholder/elder of the first village to accompany you in the nearest village to explain (Then after done please carry him back to his house!!)

Procedures for measuring:

Clothes: only light short and pants, no shoes no caps

Edema 0 + ++ +++

Weight in kg comma 0.1 kg; height in cm comma 0.1 cm; MUAC in mm

Check results with reference table

Refer malnourished children for assistance: we will provide form with data to accompany the child.

6) Mortality

Self explaining, recall period is starting from Eid ul Adha = September 11 2016.

Birthday please use format yy-mm-dd 161225 = 25 December 2016

In case of deaths put the correct number in Cause and Location

Appendix 3: HDDS FCS HHS tables

KAP 2887 ASSESSMENT - FOOD GROUPS TABLE						
Food Item	Days eaten		Primary Source	Secondary Source	FCS	HDDS
	Yesterday	Past Week				
#.1 – Maize					A-2	Cereals
#.2 – Rice					A-2	Cereals
#.3 – Bread/wheat					A-2	Cereals
#.4 – Tubers					A-2	Root and tubers
#.5 – Groundnuts & Pulses					B-3	Pulses
#.6 – Fish (eaten as a main food)					E-4	Fish
#.7 – Fish powder (used for flavor only)					I-0	Miscellaneous
#.8 – Red meat (sheep/goat/beef)					E-4	Meat, poultry, offal
#.9 – White meat (poultry)					E-4	Meat, poultry, offal
#.10 – Vegetable oil, fats					H-0.5	Oil,fats
#.11 – Eggs					E-4	Eggs
#.12 – Milk and dairy products (main food)					F-4	Milk and milk products
#.13 – Milk in tea in small amounts					G-0.5	Miscellaneous
#.14 – Vegetables (including leaves)					C-1	Vegetables
#.15 – Fruits					D-1	Fruits
#.16 – Sweets, sugar					G-0.5	Sugar, honey

outcomes	HDDS	FCS	variety I	variety II
manual calculation				
automatic calculation	0	0	double source	

HHS Household Hunger Score	#
1. worry that your household would not have enough food?	
2. not able to eat the kinds of foods you preferred because of a lack of resources?	
3. have to eat a limited variety of foods due to a lack of resources?	
4. have to eat some foods that you really did not want because lack resources for other foods?	
5. have to eat a smaller meal than you felt you needed because there was not enough food?	
6. have to eat fewer meals in a day because there was not enough food?	
7. was there ever no food to eat of any kind in your house because of lack of resources to get food?	
8. go to sleep at night hungry because there was not enough food?	
9. go a whole day and night without eating anything because there was not enough food?	
HHS =	0

In the past 4 weeks (30 days) did you or any household member:

0 = No 1 = Rarely (1–2 times) 2 = Sometimes (3–10 times) 3 = Often (more than 10 times)

Appendix 5: Result Tables for NCHS growth reference 1977

Table 5.1: Prevalence of acute malnutrition based on weight-for-height z-scores (and/or oedema) and by sex

	All n = 1251	Boys n = 641	Girls n = 610
Prevalence of global malnutrition (<-2 z-score and/or oedema)	(106) 8.5 % (6.0 - 11.8 95% C.I.)	(66) 10.3 % (7.1 - 14.6 95% C.I.)	(40) 6.6 % (4.3 - 9.9 95% C.I.)
Prevalence of moderate malnutrition (<-2 z-score and >=-3 z-score, no oedema)	(88) 7.0 % (4.8 - 10.2 95% C.I.)	(54) 8.4 % (5.5 - 12.6 95% C.I.)	(34) 5.6 % (3.6 - 8.6 95% C.I.)
Prevalence of severe malnutrition (<-3 z-score and/or oedema)	(18) 1.4 % (0.8 - 2.7 95% C.I.)	(12) 1.9 % (0.9 - 3.9 95% C.I.)	(6) 1.0 % (0.4 - 2.4 95% C.I.)

The prevalence of oedema is 0.7 %

Table 5.2: Prevalence of acute malnutrition by age, based on weight-for-height z-scores and/or oedema

Age (mo)	Total no.	Severe wasting (<-3 z-score)		Moderate wasting (>= -3 and <-2 z-score)		Normal (> = -2 z score)		Oedema	
		No.	%	No.	%	No.	%	No.	%
6-17	288	5	1.7	38	13.2	242	84.0	3	1.0
18-29	304	4	1.3	26	8.6	269	88.5	5	1.6
30-41	302	0	0.0	18	6.0	283	93.7	1	0.3
42-53	267	0	0.0	3	1.1	264	98.9	0	0.0
54-59	90	0	0.0	3	3.3	87	96.7	0	0.0
Total	1251	9	0.7	88	7.0	1145	91.5	9	0.7

Table 5.3: Distribution of acute malnutrition and oedema based on weight-for-height z-scores

	<-3 z-score	>=-3 z-score
Oedema present	Marasmic kwashiorkor No. 1 (0.1 %)	Kwashiorkor No. 8 (0.6 %)
Oedema absent	Marasmic No. 11 (0.9 %)	Not severely malnourished No. 1240 (98.4 %)

Table 5.4: Prevalence of acute malnutrition based on MUAC cut off's (and/or oedema) and by sex

	All n = 1268	Boys n = 647	Girls n = 621
Prevalence of global malnutrition (< 125 mm and/or oedema)	(183) 14.4 % (11.8 - 17.5 95% C.I.)	(94) 14.5 % (11.4 - 18.3 95% C.I.)	(89) 14.3 % (11.0 - 18.5 95% C.I.)
Prevalence of moderate malnutrition (< 125 mm and >= 115 mm, no oedema)	(140) 11.0 % (8.7 - 13.9 95% C.I.)	(72) 11.1 % (8.3 - 14.7 95% C.I.)	(68) 11.0 % (8.1 - 14.7 95% C.I.)
Prevalence of severe malnutrition (< 115 mm and/or oedema)	(43) 3.4 % (2.4 - 4.7 95% C.I.)	(22) 3.4 % (2.2 - 5.3 95% C.I.)	(21) 3.4 % (2.1 - 5.3 95% C.I.)

Table 5.5: Prevalence of acute malnutrition by age, based on MUAC cut off's and/or oedema

Age (mo)	Total no.	Severe wasting (< 115 mm)		Moderate wasting (>= 115 mm and < 125 mm)		Normal (>= 125 mm)		Oedema	
		No.	%	No.	%	No.	%	No.	%
6-17	296	20	6.8	79	26.7	197	66.6	3	1.0
18-29	312	8	2.6	40	12.8	264	84.6	5	1.6
30-41	302	2	0.7	14	4.6	286	94.7	1	0.3
42-53	268	4	1.5	5	1.9	259	96.6	0	0.0
54-59	90	1	1.1	3	3.3	86	95.6	0	0.0
Total	1268	35	2.8	141	11.1	1092	86.1	9	0.7

Table 5.6: Prevalence of acute malnutrition based on the percentage of the median and/or oedema

	n = 1251
Prevalence of global acute malnutrition (<80% and/or oedema)	(55) 4.4 % (3.1 - 6.1 95% C.I.)
Prevalence of moderate acute malnutrition (<80% and >= 70%, no oedema)	(45) 3.6 % (2.6 - 5.0 95% C.I.)
Prevalence of severe acute malnutrition (<70% and/or oedema)	(10) 0.8 % (0.3 - 1.9 95% C.I.)

Table 5.7: Prevalence of malnutrition by age, based on weight-for-height percentage of the median and oedema

Age (mo)	Total no.	Severe wasting (<70% median)		Moderate wasting (>=70% and <80% median)		Normal (>=80% median)		Oedema	
		No.	%	No.	%	No.	%	No.	%
6-17	288	0	0.0	22	7.6	263	91.3	3	1.0
18-29	304	1	0.3	16	5.3	282	92.8	5	1.6

54-59	86	21	24.4	21	24.4	44	51.2
Total	1181	206	17.4	346	29.3	629	53.3

Table 5.12: Prevalence of overweight based on weight for height cut off's and by sex (no oedema)

	All n = 1251	Boys n = 641	Girls n = 610
Prevalence of overweight (WHZ > 2)	(16) 1.3 % (0.8 - 2.1 95% C.I.)	(9) 1.4 % (0.7 - 2.8 95% C.I.)	(7) 1.1 % (0.6 - 2.3 95% C.I.)
Prevalence of severe overweight (WHZ > 3)	(0) 0.0 % (0.0 - 0.0 95% C.I.)	(0) 0.0 % (0.0 - 0.0 95% C.I.)	(0) 0.0 % (0.0 - 0.0 95% C.I.)

Table 5.13: Prevalence of overweight by age, based on weight for height (no oedema)

Age (mo)	Total no.	Overweight (WHZ > 2)		Severe Overweight (WHZ > 3)	
		No.	%	No.	%
6-17	288	4	1.4	0	0.0
18-29	304	6	2.0	0	0.0
30-41	302	4	1.3	0	0.0
42-53	267	2	0.7	0	0.0
54-59	90	0	0.0	0	0.0
Total	1251	16	1.3	0	0.0

Table 5.14: Mean z-scores, Design Effects and excluded subjects

Indicator	n	Mean z-scores \pm SD	Design Effect (z-score < -2)	z-scores not available*	z-scores out of range
Weight-for-Height	1242	-0.49 \pm 1.05	3.35	21	9
Weight-for-Age	1240	-1.46 \pm 1.07	3.10	14	18
Height-for-Age	1181	-1.86 \pm 1.19	1.67	0	91

* contains for WHZ and WAZ the children with edema.

Appendix 6: Plausibility Report ENA

Plausibility check for: 0-AFN-KDH-INTRS-HRDA(Full).as

Standard/Reference used for z-score calculation: WHO standards 2006

(If it is not mentioned, flagged data is included in the evaluation. Some parts of this plausibility report are more for advanced users and can be skipped for a standard evaluation)

Overall data quality

Criteria	Flags*	Unit	Excel.	Good	Accept	Problematic	Score

OVERALL SCORE WHZ =			0-9	10-14	15-24	>25	13 %

The overall score of this survey is 13 %, this is good.

There were no duplicate entries detected.

Percentage of children with no exact birthday: 95 %

Anthropometric Indices likely to be in error (-3 to 3 for WHZ, -3 to 3 for HAZ, -3 to 3 for WAZ, from observed mean - chosen in Options panel - these values will be flagged and should be excluded from analysis for a nutrition survey in emergencies. For other surveys this might not be the best procedure e.g. when the percentage of overweight children has to be calculated):

Evaluation of Standard deviation, Normal distribution, Skewness and Kurtosis using the 3 exclusion (Flag) procedures

	no exclusion	exclusion from reference mean (WHO flags)	exclusion from observed mean (SMART flags)
WHZ			
Standard Deviation SD: (The SD should be between 0.8 and 1.2)	1.27	1.27	1.15
Prevalence (< -2)			
observed:	9.1%	9.1%	8.2%
calculated with current SD:	7.8%	7.8%	6.1%
calculated with a SD of 1:	3.6%	3.6%	3.7%
HAZ			
Standard Deviation SD: (The SD should be between 0.8 and 1.2)	1.91	1.60	1.21
Prevalence (< -2)			
observed:	52.3%	52.5%	53.2%
calculated with current SD:	47.6%	49.0%	51.4%
calculated with a SD of 1:	45.4%	48.4%	51.7%
WAZ			
Standard Deviation SD: (The SD should be between 0.8 and 1.2)	1.19	1.19	1.11
Prevalence (< -2)			
observed:	23.7%	23.7%	23.5%
calculated with current SD:	25.4%	25.4%	24.5%
calculated with a SD of 1:	21.5%	21.5%	22.2%

Results for Shapiro-Wilk test for normally (Gaussian) distributed data:

WHZ	p= 0.000	p= 0.000	p= 0.000
HAZ	p= 0.000	p= 0.000	p= 0.000
WAZ	p= 0.002	p= 0.002	p= 0.006

(If p < 0.05 then the data are not normally distributed. If p > 0.05 you can consider the data normally distributed)

Skewness

WHZ	-0.04	-0.04	-0.12
HAZ	1.84	0.91	0.22
WAZ	0.05	0.05	-0.11

If the value is:

- below minus 0.4 there is a relative excess of wasted/stunted/underweight subjects in the sample
- between minus 0.4 and minus 0.2, there may be a relative excess of wasted/stunted/underweight subjects in the sample.
- between minus 0.2 and plus 0.2, the distribution can be considered as symmetrical.
- between 0.2 and 0.4, there may be an excess of obese/tall/overweight subjects in the sample.
- above 0.4, there is an excess of obese/tall/overweight subjects in the sample

Kurtosis

WHZ	0.19	0.19	-0.47
HAZ	7.59	2.54	-0.37
WAZ	0.43	0.43	-0.18

Kurtosis characterizes the relative size of the body versus the tails of the distribution. Positive kurtosis indicates relatively large tails and small body. Negative kurtosis indicates relatively large body and small tails.

If the absolute value is:

- above 0.4 it indicates a problem. There might have been a problem with data collection or sampling.
- between 0.2 and 0.4, the data may be affected with a problem.
- less than an absolute value of 0.2 the distribution can be considered as normal.

Test if cases are randomly distributed or aggregated over the clusters by calculation of the Index of Dispersion (ID) and comparison with the Poisson distribution for:

WHZ < -2: ID=4.09 (p=0.000)
 WHZ < -3: ID=1.47 (p=0.005)
 Oedema: ID=2.02 (p=0.000)
 GAM: ID=3.89 (p=0.000)
 SAM: ID=1.78 (p=0.000)
 HAZ < -2: ID=1.18 (p=0.130)
 HAZ < -3: ID=1.55 (p=0.001)
 WAZ < -2: ID=2.19 (p=0.000)
 WAZ < -3: ID=1.34 (p=0.027)

Subjects with SMART flags are excluded from this analysis.

The Index of Dispersion (ID) indicates the degree to which the cases are aggregated into certain clusters (the degree to which there are "pockets"). If the ID is less than 1 and $p > 0.95$ it indicates that the cases are UNIFORMLY distributed among the clusters. If the p value is between 0.05 and 0.95 the cases appear to be randomly distributed among the clusters, if ID is higher than 1 and p is less than 0.05 the cases are aggregated into certain cluster (there appear to be pockets of cases). If this is the case for Oedema but not for WHZ then aggregation of GAM and SAM cases is likely due to inclusion of oedematous cases in GAM and SAM estimates.

Are the data of the same quality at the beginning and the end of the clusters?

Evaluation of the SD for WHZ depending upon the order the cases are measured within each cluster (if one cluster per day is measured then this will be related to the time of the day the measurement is made).

Time point	SD for WHZ
	0.8 0.9 1.0 1.1 1.2 1.3 1.4 1.5 1.6 1.7 1.8 1.9 2.0 2.1 2.2 2.3

6 to 17	12	33/28.1 (1.2)	19/23.4 (0.8)	52/51.5 (1.0)	1.74
18 to 29	12	20/27.4 (0.7)	26/22.8 (1.1)	46/50.2 (0.9)	0.77
30 to 41	12	30/26.5 (1.1)	25/22.1 (1.1)	55/48.7 (1.1)	1.20
42 to 53	12	23/26.1 (0.9)	20/21.8 (0.9)	43/47.9 (0.9)	1.15
54 to 59	6	15/12.9 (1.2)	11/10.8 (1.0)	26/23.7 (1.1)	1.36
6 to 59	54	121/111.0 (1.1)	101/111.0 (0.9)		1.20

The data are expressed as observed number/expected number (ratio of obs/expect)

Overall sex ratio: p-value = 0.179 (boys and girls equally represented)
 Overall age distribution: p-value = 0.753 (as expected)
 Overall age distribution for boys: p-value = 0.405 (as expected)
 Overall age distribution for girls: p-value = 0.774 (as expected)
 Overall sex/age distribution: p-value = 0.099 (as expected)

Evaluation of the SD for WHZ depending upon the order the cases are measured within each cluster (if one cluster per day is measured then this will be related to the time of the day the measurement is made).

Team: 1

11. Results Phase 1 (anthropometries 1: 993)

11.1 Anthropometric results (based on WHO standards 2006):

Definitions of acute malnutrition should be given (for example, global acute malnutrition is defined as <-2 z scores weight-for-height and/or oedema, severe acute malnutrition is defined as <-3 z scores weight-for-height and/or oedema)

Exclusion of z-scores from Observed mean SMART flags: WHZ -3 to 3 ; HAZ -3 to 3 ; WAZ -3 to 3

Table 11.1: Distribution of age and sex of sample

AGE (mo)	Boys		Girls		Total		Ratio
	no.	%	no.	%	no.	%	Boy:girl
6-17	113	59.8	76	40.2	189	21.2	1.5
18-29	107	47.1	120	52.9	227	25.5	0.9
30-41	104	48.1	112	51.9	216	24.2	0.9
42-53	85	44.3	107	55.7	192	21.5	0.8
54-59	29	43.3	38	56.7	67	7.5	0.8
Total	438	49.2	453	50.8	891	100.0	1.0

Table 11.2: Prevalence of acute malnutrition based on weight-for-height z-scores (and/or oedema) and by sex

	All n = 865	Boys n = 426	Girls n = 439
Prevalence of global malnutrition (<-2 z-score and/or oedema)	(72) 8.3 % (5.3 - 12.9 95% C.I.)	(45) 10.6 % (6.3 - 17.3 95% C.I.)	(27) 6.2 % (3.9 - 9.7 95% C.I.)
Prevalence of moderate malnutrition (<-2 z-score and \geq-3 z-score, no oedema)	(61) 7.1 % (4.2 - 11.6 95% C.I.)	(36) 8.5 % (4.6 - 15.1 95% C.I.)	(25) 5.7 % (3.5 - 9.2 95% C.I.)
Prevalence of severe malnutrition (<-3 z-score and/or oedema)	(11) 1.3 % (0.6 - 2.8 95% C.I.)	(9) 2.1 % (0.9 - 5.0 95% C.I.)	(2) 0.5 % (0.1 - 1.8 95% C.I.)

The prevalence of oedema is 1.0 %

Table 11.3: Prevalence of acute malnutrition by age, based on weight-for-height z-scores and/or oedema

Age (mo)	Total no.	Severe wasting (<-3 z-score)		Moderate wasting (>= -3 and <-2 z-score)		Normal (> = -2 z score)		Oedema	
		No.	%	No.	%	No.	%	No.	%
6-17	182	0	0.0	24	13.2	155	85.2	3	1.6
18-29	217	1	0.5	16	7.4	195	89.9	5	2.3

42-53	192	4	2.1	30	15.6	158	82.3	0	0.0
54-59	66	5	7.6	12	18.2	49	74.2	0	0.0
Total	871	62	7.1	140	16.1	669	76.8	9	1.0

Table 11.9: Prevalence of stunting based on height-for-age z-scores and by sex

	All n = 841	Boys n = 407	Girls n = 434
Prevalence of stunting (<-2 z-score)	(456) 54.2 % (49.8 - 58.6 95% C.I.)	(216) 53.1 % (48.1 - 58.0 95% C.I.)	(240) 55.3 % (48.5 - 61.9 95% C.I.)
Prevalence of moderate stunting (<-2 z-score and >=-3 z-score)	(248) 29.5 % (25.9 - 33.3 95% C.I.)	(116) 28.5 % (24.3 - 33.2 95% C.I.)	(132) 30.4 % (25.7 - 35.6 95% C.I.)
Prevalence of severe stunting (<-3 z-score)	(208) 24.7 % (20.5 - 29.5 95% C.I.)	(100) 24.6 % (19.6 - 30.3 95% C.I.)	(108) 24.9 % (19.8 - 30.8 95% C.I.)

Table 11.10: Prevalence of stunting by age based on height-for-age z-scores

Age (mo)	Total no.	Severe stunting (<-3 z-score)		Moderate stunting (>= -3 and <-2 z-score)		Normal (> = -2 z score)	
		No.	%	No.	%	No.	%
6-17	176	17	9.7	35	19.9	124	70.5
18-29	210	56	26.7	70	33.3	84	40.0
30-41	203	72	35.5	71	35.0	60	29.6
42-53	186	46	24.7	55	29.6	85	45.7
54-59	66	17	25.8	17	25.8	32	48.5
Total	841	208	24.7	248	29.5	385	45.8

Table 11.11: Prevalence of overweight based on weight for height cut off's and by sex (no oedema)

	All n = 865	Boys n = 426	Girls n = 439
Prevalence of overweight (WHZ > 2)	(23) 2.7 % (1.7 - 4.1 95% C.I.)	(13) 3.1 % (1.8 - 5.3 95% C.I.)	(10) 2.3 % (1.2 - 4.3 95% C.I.)
Prevalence of severe overweight (WHZ > 3)	(0) 0.0 % (0.0 - 0.0 95% C.I.)	(0) 0.0 % (0.0 - 0.0 95% C.I.)	(0) 0.0 % (0.0 - 0.0 95% C.I.)

Table 11.12: Prevalence of overweight by age, based on weight for height (no oedema)

Age (mo)	Total no.	Overweight (WHZ > 2)		Severe Overweight (WHZ > 3)	
		No.	%	No.	%
6-17	182	1	0.5	0	0.0
18-29	217	4	1.8	0	0.0
30-41	209	6	2.9	0	0.0
42-53	190	9	4.7	0	0.0
54-59	67	3	4.5	0	0.0
Total	865	23	2.7	0	0.0

Table 11.13: Mean z-scores, Design Effects and excluded subjects

Indicator	n	Mean z-scores ± SD	Design Effect (z-score < -2)	z-scores not available*	z-scores out of range
Weight-for-Height	856	-0.11±1.17	4.15	14	21
Weight-for-Age	871	-1.24±1.09	2.72	14	6
Height-for-Age	841	-2.13±1.23	1.64	0	50

* contains for WHZ and WAZ the children with edema.
